CASNR

continued from page 1

Professor Rosie Nold says, "A distinct advantage CASNR students have is the broad range of experiences available to them outside of the classroom. Internships, study tours in the U.S. and abroad, judging team competitions and other experiences contribute greatly to their readiness to enter the work force."

To respond to new career opportunities, CASNR has recently added new majors: Insect Sciences and Hospitality, Restaurant and Tourism Management. In 2004, CASNR became the 15th college to join the PGA of America's

Professional Golf Management Program.

High school junior Brandon Wedding plans to turn his love of golf into a career. "I'm looking forward to attending the University of Nebraska next year in the Professional Golf Management Program," says Wedding. "I think it's a great opportunity for advancement in the golf industry."

CASNR College Relations Director Laura Frey says, "Not only does our college offer a breadth of learning opportunities both in the classroom and out, but we also offer a variety of scholarships, as well as provide students with the ability to grow personally and professionally."

High school junior Brandon Wedding plans to enroll in CASNR's Professional Golf Management program.

Your Talent Can Lead to an Exciting Career

Jill Brown of Career Services at the University of Nebraska-Lincoln College of Agricultural Sciences and Natu-

ral Resources (CASNR) has compiled the following chart to help youth begin to explore career options based on their

talents and interest areas. These and other majors are offered by CASNR.
