

Youth Science Day for Homeschooled Youth

Thursday, Nov. 2, 2017

Choose from two times slots (same content both times):
9–11:30 a.m. or 1–3:30 p.m.

Lancaster Extension Education Center, 444 Cherrycreek Road, Lincoln

Open to all homeschooled youth, grades K–6th (most lessons geared towards 3rd–5th graders)

Youth will rotate through 5 hands-on stations doing science, technology, engineering and math (STEM) activities.

Fee: \$5 per youth

Preregistration requested by Oct. 20 by contacting Kate Pulec at 402-441-7180 or kpulec3@unl.edu

Youth will have the opportunity to:

- Demonstrate and utilize STEM skills and abilities to solve everyday situations.
- Process information, analyze complex problems and make informed decisions regarding current agricultural, environmental and technology related issues.
- Develop positive interests and attitudes about STEM and related careers and seek out higher education opportunities and careers related to STEM.

Science activities will include embryology and maybe candling eggs with a light to see chick development.

Engineering activities may include building structures and testing their strength.
