

It's harvest
time in
Nebraska!

Lancaster County 4-H invites your school to participate in the iGrow school enrichment program to learn more about corn, one of Nebraska's top agricultural industries!

Did you know, Nebraska ranks 1st in the U.S. for popcorn production and 3rd for other corn production?

Currently, around 1.3% of the U.S. population is directly involved with agriculture. As communities continue to urbanize, youth are losing touch with modern farming practices. This research-based program is designed to help connect youth to agriculture, help them understand where their food comes from, and learn the many ways corn is used.

The iGrow program consists of all — or your choice of — the following:

- Display shown above consisting of banners, animal cutouts, corn, etc. (K–12 grades)
- Worksheets with hands-on activities (3–5 grades)
- Classroom presentations led by Lancaster County 4-H staff (K–12 grades)

To schedule the iGrow display and program,
please contact 4-H Extension Assistant
Calvin DeVries at 402-441-7180
or cdevries2@unl.edu.

"It was like a
'mini-field trip'
at the school."
—Nebraska teacher
