# Removing Head Lice Safely Video

Photo by Barb Ogg, UNL Extension in Lancaster County

Adult head lice are 1/10 to 1/8" long and are tan to grayish-white (highly magnified view).

Photo by Jim Kalisch, UNL Department of Entomology

Eggs (called nits) are glued to individual hair strands about 1/2-inch from the scalp (highly magnified view).

## Information is easy to understand and includes:

- inspecting a child's head for lice
- magnified live head lice
- hands-on combing demonstration
- ways to prevent reinfestation

## Teaches:

- why some treatments may be less effective today
- how quickly infestations get started
- why using a metal lice comb is the only method that will remove hard-to-kill nits
- how to break the lice life cycle

## Head Lice Resources You Can Trust

Video, educational resources and more are available free online at <http://lancaster.unl.edu/pest/lice>
